Subject:	Re: 3CPM 50 EGGs
Attachments:	EGGID.ZIP

Mark,Bob,

EGG device was shipped yesterday 2-17.
UPS tracking number: 1z9867661210075155
In the attached zip there are
new drivers and example file.
Driver has 2 new functions:
Get_Data(...) to read device ID number
and Send_Data(...) to write ID number.
Driver works with older devices and
return ID for them of all zeros.
New device doesn`t work with old driver!
In "example.cpp" ID number is read from
file "EGG_ID.txt".Edit it to write
different numbers, but keep format exakt.

Good luck.
Igor.

Igor:

Ship the device to Bob Thawley, our programmer.
Please communicate directly with Bob regarding anything he needs to know to do the testing regarding the changes or differences.
His address is:

616 Hampton Court
Doylestown, PA 18901

Thank you,

From: IGOR IAROSLAVTSEV [mailto:iviar@embarqmail.com]

Mark,

We`ll be ready to ship one device
for making changes and testing with your
software on Tuesday or Wednesday.
What is the best shipping address?
After your approval we`ll ship remaining units.

Igor.
